The new MyBlock™ HL is the first and only mini heat block featuring a heated lid for protecting samples against unwanted condensation and evaporation. Both the block and lid temperature can be selected independently in increments of 0.1°C, making this MyBlock the ideal choice for the most temperature sensitive applications, including immunoassays, LAMP assays, enzyme reactions & other hyper-sensitive temperature procedures.

Two blocks are available, the 0.2ml block (item BSH100-02) accommodates up to forty 0.2ml PCR tubes or up to 5 eight position PCR strips. The 0.5ml block (item BSH100-05) holds a maximum of twenty-four 0.5ml tubes.
